

## GENERAL INFORMATION

### BOOKINGS

- The examinations can be performed both in convention with the National Sanitary System and also privately.
- The reception office is open from 08.00 until 17.00, from Monday to Friday.
- The visits can be booked both personally and by telephone.
- In order to book it is necessary to indicate the type of examination that has to be performed, his\her own name and the telephone number.

*In case of impossibility to respect the booking you are asked to cancel the visit in time in order to permit visits otehrwise following the Deliberation 600/2007, TICKET will be also paid by the exempt patients*

### SERVICES RENDERED BY SPECIALISTS

All the examinations are directly performed by a specialist or under his forehand control Remember that to the senses of the art.111 31/3/95 L.230 the medical prescription has to contain both the type of examinations to have to be performed (as suitable as in the Regional Tariff) and the reasons why they had to be prescript.

#### 1) SECTION OF BREAST DIAGNOSIS

- senologic visit
- mammography
- mammary ultrasonography

The examinations are performed and services provided in an integrated and contemporary way: this kind of method allows both the diagnosis most accurate possible and the opportunity to get the results in real time (except the cases when it is necessary to have recourse to the biopsy).

#### 2) SECTION OF TRADITIONAL RADIOLOGY

THE X-RAY EXAMINATIONS ARE CONTRAINDICATED IN CASE OF PREGNANCY  
THE WOMEN IN PRODUCTIVE AGE ARE ASKED TO COMUNICATE TO THE MEDICAL PERSONNEL THE STATE OF PREGNANCY (CERTAIN OR PRESUMED)  
Art. 10 decree 187/2000.

- teleradiografia of the skull
- rx chest - bones and articulations - abdomen in white
- rx cervicale/dorsale/lombo-sacred column

#### 3) SECTION OF ULTRASONOGRAPHY IN THE INTERNAL MEDICINE

- thyroid
- superior and inferior abdomen
- pelvic and prostatic and urinay bladder
- transvaginal
- muscle-tendinea and osteoarticular
- echocardiography

#### 4) SECTION VASCULAR COLODOPPLER ULTRASONOGRAPHY

- angiologic visit
- TSA
- superior and inferior arts : arterial and venous
- abdominal aort

#### 5) SECTION OF MAGNETIC RESONANCE OF JOINTS

#### 6) SECTION OF DENSITOMETRIA OSSEA

##### COMPUTERIZED

- lumbar column - femur (in convention with SSN)
- total body

### AVERAGE PERIOD OF EXPECTATION

In case of urgency the consumer can talk to the doctor and the examination will always be performed as soon as possible.  
SENOLOGICAL DIAGNOSIS

For a periodical control of the breasts it is possible to book the following control at the same time of the last examination.

ULTRASONOGRAPHY IN THE INTERNAL MEDICINE **1-7 days**

VASCULAR COLORDOPPLER ULTRASONOGRAPHY **1-7 days**

MAGNETIC RESONANCE OF JOINTS **1-7 days**

BONES DENSITOMETRY **1-7 days**

CONVENTIONAL RADIOLOGY \ RM **1-7 days**

**For examinations in convention with the National Sanitary System** the period of expectation is determined by the priority class written in the prescription.

### RECEPTION

The reception office welcomes the consumers and gives the necessary information.

Both the ticket and the bills for private performances are received during the reception, before the execution of the examination.

The payment can be by cash or by banking check or by bancomat.

The required registration data, necessary to create an identification briefcase for the administrative purposes and for possible following communications, are protected according to the current laws on the protection of the persons and other subjects in comparison to the treatment of the personal data.

It is necessary to bring all the possible previous examinations even if performed in an other center.

It is convenient to arrive at least ten minutes before the examination to fulfil all the reception requirements.

During the reception it is necessary to bring :

1. the binding (if the examination must be performed in convention),
2. the sanitary book (make sure of its validity to avoid to have to pay the full tariff of the performance)
3. the fiscal code
4. all the possible preceding examinations even if performed in other structures

After the administrative formalities, a number will be assigned to the consumer for the non nominative called to the senses of the law on privacy.

#### DELIVERED REPORTS

The reports of the conventional radiology examinations and of magnetic resonance are delivered after 3 days, urgencies excepted.

The reports of all the other examinations are delivered at the end of the examination, particular cases excepted.

If the report will be withdrawn by an appointee it is necessary that they have a written authorisation (it is available a special form for it at the reception office).

*Allowed to Norm Of the Deliberation 600/2007 the non retired reports after 30 days from the execution the performance has to be paid also by the exempt patients by the full tariff.*

#### CLAIMS

Claims, observations and suggestions must be communicated at the reception office in order to improve the service; the structure will analyse every communication as soon as possible.

#### MEDICAL MACHINES USED BY THE STRUCTURE

The conventional radiologic examinations and mammography are dispatched by the Digital Technique (KODAK-CARE ELITE DRYVIEW 6800) so that to get good quality radiographies with very low radiations doses.

The quality controls have periodically been being dispatched for the technicians of radiology of the structure and every year by the qualified expert.

#### SECTION OF BREAST DIAGNOSIS:

mammography machine GENERAL ELECTRIC PRISTINA

#### SECTION OF CONVENTIONAL RADIOLOGY:

Cefalostato SIEMENS for teleradiografie of the skull.

Generating to ray-X to tall frequency, to microprocessors for digital technique.

Teleradiography of great format for examinations of the chest and the column for scoliosi.

#### SECTION ULTRASONOGRAPHY AND COLOR DOPPLER VASCOLARE:

digital ultrasound machine ESAOTE TECHNOS MY LAB 90

digital ultrasound machine ESAOTE TECHNOS MY LAB C

digital ultrasound machine HITACHI AVIUS

#### SECTION OF BONES DENSITOMETRY:

computerized densitometer HOLOGIC DELPHI QDR SERIES with I.V.A. (Instant Vertebral Assessment).

#### SECTION OF MAGNETIC RESONANCE: ESAOTE TMR O-SCAN
